

A.E.D. - AUTOMATED EXTERNAL DEFIBRILLATOR

Schools should be equipped with all four of the following signage. If you are missing signage or your signage has become damaged please contact the Divisional S&H Officer.

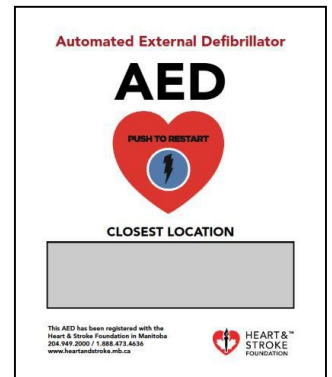

AED Window Clings:

Must be located at the main entrance or at each of the main entrances, if more than one, of each building with a defibrillator. Window clings must be located on the outer most door or window and indicated the closest location of the AED

Metal/Plastic AED Signs:

These AED signs must be located throughout the building and on every floor to indicate the location of the closest AED.

AED – 3D Signage:

3D- AED signage must be located adjacent to each defibrillator, perpendicular to the wall so that the sign can be seen by a person walking in either direction parallel to the wall on which the sign is posted.

Instructions for use:

This sticker is to be applied to the front window of each AED cabinet. The sticker may require trimming at the sides to fit the window.
