Dear Parents/Guardians;

Welcome to the Pembina Trails School Division! We are pleased that you are joining us, and we look forward to a strong, positive home/school partnership as your child progresses through school.

In preparation for your child's entry to Kindergarten, it is important that school personnel be made aware of any physical or medical needs your child may have. Since physical well-being affects learning ability, we suggest that you arrange a complete physical examination for your child prior to school entry. Vision and hearing are especially important as your child begins to adapt to school life. Your family doctor can check for indications of hearing difficulty as part of the physical checkup. An eye care professional (ophthalmologist or optometrist) can advise you about your child's vision.

Please share any important health information that may affect the school's work with your child. As well, if you have any indication that your child may need special services, please make an appointment to discuss this with me.

We hope that your child's introduction to schooling will be filled with learning, caring and joy! Please do not hesitate to contact me by phone (204-889-3602 ext. 1565) or email (krioux@pembinatrails.ca) if you have any questions about Kindergarten at École Tuxedo Park.

Sincerely,

Mrs. Karine Rioux
Principal
