

December 10, 2024

On the morning of December 2, 2024, the Pembina Trails information technology team identified unusual activity within the division's network system. Immediately upon detection, the division engaged cybersecurity professionals to investigate.

On this page, we will provide updated information as we are able and as the investigation continues.

Our investigation into the December 2 incident is continuing. Our priorities remain minimizing impact on learning and safeguarding our student's and staff's information.

We have no indication that databases holding the personal information of students or staff were exposed because of the incident. If our investigation shows otherwise, affected individuals will be contacted and action taken to help them secure their information.

Our team is continuing its work to ensure that learning remains uninterrupted.

Thank you for your support.
