

December 9, 2024

The investigation into this past week's cyber security incident is continuing. Thank you for your kind messages of support to our staff and teachers.

We are committed to keeping our school community informed as we progress through restoring systems and investigating the impact. Our priorities remain minimizing impact on learning and safeguarding our student's and staff's information. We have engaged the right team of individuals to help us achieve these objectives. We are compiling questions from the community and will provide responses on this webpage as we get more information from our investigative team.

We are grateful that through the resiliency of our staff and teachers who have risen to the occasion, we have kept our schools operating so that classes can continue. Their ingenuity has been nothing short of remarkable.

We also want to acknowledge the dedication of our IT teams who have been investigating the incident since the day it started. As we work to better understand what happened and uncover what information was involved, we recognize that such an investigation may take time, possibly weeks or months.

Appreciating that this is a question we have received from many concerned parents and guardians, we want to specifically reassure that we do not store financial information on our student information system, and any financial information for international students is stored on a distinct system that was not involved in this incident.

We thank you for your support and patience as our investigation continues and as we restore systems. We are confident that we will overcome this challenge together.
