

PREPARING OUR SCHOOL BUILDINGS FOR WARM WEATHER

Pembina Trails School Division has 36 school sites ranging in age from 1 year old to 98 years old. As temperatures rise, we continue to do the following to keep our students cool while in school.

- Running the ventilation systems early in the morning to cool school building
- Controlling outside air intake during the school day
- Schools with access to A/C in areas will be cycled through the space to cool down
- Reviewing health symptoms related to heat
- Closing shades to block intense sunlight
- Taking cool-down breaks between lessons
- Avoiding excess movement during the hottest part of the day
- Switching off unused electronics that produce heat even in standby mode
- Encouraging students and staff to stay hydrated

A/C

requests are part of our yearly capital plan submissions to the Province.
