

OFF-SITE EDUCATIONAL PROGRAMMING (FIELD TRIPS)

The Board recognizes the educational value of off-site programming (including field trips, extra-curricular activities and overnight excursions). It is the desire of the Board to encourage and lend support to field trips and off-site programming provided that they are properly planned, that the learning experiences are an integral part of the instructional program, and that the plans are well implemented. Trips must properly provide for the cognitive, affective, and/or psychomotor development of students and the planned activities must constitute a reasonable and effective means of extending school learning and student knowledge and understanding.
