

## RELATIONSHIPS: SCHOOL, COMMUNITY, AND HOME

The Board believes that the Division is an integral part of the community and that community support is vital for the Division's operation and achievement of excellence. The Board and Division staff members recognize that community support is based on a mutual exchange in which the Division contributes to the community's success and, in turn, benefits from the community's resources.

In order to maintain productive relationships with the community, the Division commits to:

Effective, accurate, and meaningful communications that facilitate dialogue, encourage involvement in Division programs, and create community advocacy for its public schools.

Volunteer programs that provide mutually enriching experiences for our students, staff, and community volunteers.

Recognition programs that publicly honor the contributions of our students, employees, and community partners and express pride in our individual and collective accomplishments.

Community service efforts which enable the Division's and students to express their commitment to the community.

*Accomplish Anything*
