PRIVATE OR SMALL GROUP?

We offer private and small group classes. Your child will benefit from our excellent, science-based programs, regardless of the type of class you choose.

PRIVATE CLASSES

With private classes, your child will receive individualized instruction from a certified teacher following a personalized program regularly adjusted based on their progress. We recommend scheduling 3-4 classes per week.

SMALL GROUP CLASSES

Learners are grouped based on their reading level and progress in small group classes with only 2-5 students. This interactive approach makes learning dynamic and fun!

WHAT TO EXPECT FROM EACH SESSION

Each session consists of three main components: the practice of essential reading skills, a decodable/authentic book reading practice, and French vocabulary development and enrichment practice.

ESSENTIAL SKILLS PRACTICE

In the first part of the class, we will introduce, review, and practice skills that are essential to reading success, such as phonemic awareness, phonics, and high-frequency and sight words, based on each individual student's level.

READING PRACTICE

A confident reader selects books that are appropriate for their reading level and that they find interesting. In our educational program, learners will read decodable and authentic books selected by their teacher based on their reading level and preferences. While reading engaging texts, we will also focus on developing fluency and comprehension skills.

VOCABULARY DEVELOPMENT

Acquiring French vocabulary is crucial for success in reading the language. Interactive games can make the process more engaging.
